

“Bluer Than My New Blue Jeans” is my second CD. The songs on it I wrote and recorded in December 2010 just two years after my hands touched a keyboard for the first time.

All the piano and vocals on this CD were done by me. The bass and drum tracks all courtesy of the Boss DR-880 rhythm machine. Though my musical talents are limited, learning to play electric keyboard has become my favorite retirement activity. Creating this CD is a way of showing off what I’ve accomplished to date.

The songs on this CD album feature left hand boogie patterns you will hear alone at the start of a song. Through the magic of recording usually there are two right hands, one playing a melody track and the other playing a solo track. The lyrics are surely corny but I believe the instrument tracks are tight and sounding good.

For information on my keyboard and recording rig visit my blog site. Also now and in the future you will find my songs for download at
